Trust

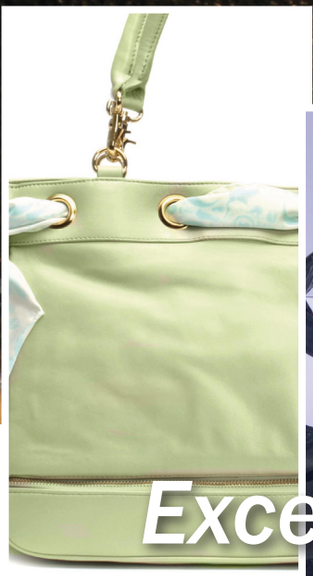
Kolkata (Formerly Calcutta), has always been the source of quality leather ever since the first Colonial Indian tannery was set up in 1795. The tradition of excellence has been upheld by the expert craftsmanship of the Indian Chinese Tanners ever since the 1940s, and till today, their leather and leather products are still one of the highest in demand owing to modern machinery, traditional methodology, personal involvement and a highly meticulous system of quality control.

We, at ***Sheong Shi Tannery*** (which means Double Lion Tannery) believe in those very ideals which sets us apart from the rest of the industry. Our passion to deliver, coupled with our excellence of execution has made us a favourite one stop solution for many buyers from India as well as abroad.

At Sheong Shi Tannery, trust, responsibility and high quality output are an integral part of our business and operations.

Excellence



Sheong Shi Tannery specializes in the manufacture of high quality finished leather for handbags, wallets, purses, portfolio, shoes and a host of other leather products using cutting edge technology and state of the art machinery.

Our highly qualified and dedicated R & D department constantly work towards new innovations and breakthroughs to develop new leathers to cater to demands of the latest fashion in Europe, America and elsewhere.

Our company currently manufactures about **one lakh sq. ft. of leather per month** and has the capacity and provisions to increase this to **three lakhs sq. ft. per month** when required.

Responsibility

We believe that the protection and conservation of the environment is our moral responsibility in order for our future generations to live in a healthy and beautiful world as we do.

To fulfil this responsibility, we follow strict international protocols ensuring that all effluent going out of our premises are properly treated first in our own primary treatment plant and chrome recovery plant. Tanning processes employing low percentage of environment hazardous chemicals and high percentage of natural vegetable tanning extracts are used. Our commitment to the cause has led us to develop and manufacture ***completely chrome free leathers.***

We also believe in Child Rights and a **No Child Labour policy.** Our company is also dedicated to helping needy children by providing schooling, health care and shelter.
